EDUCATION

MAHIDOL UNIVERSITY
Bachelor of Computer Engineering
2024-2028

BANGKOK CHRISTIAN COLLAGE
Pre-General Engineering
2011-2023

SKILLS

- **Programming language:**
  C, C++, JavaScript, Python
- **Web Development:** React
- **Version Control:** Github
- **AI Prompt Engineering**
- **Project Management**
- **Public Relation**
- **Google Sheet Code**

CERTIFICATION

PYTHON DEVELOPER
2024
SOLOLEARN

ABOUT ME

I am a passionate and driven individual currently pursuing a Bachelor's degree in Computer Engineering at Mahidol University International College (MUIC), where I started my academic journey in October 2023. My interest in coding began in 2021, and since then, I have developed skills in C, C++, JavaScript, and HTML, with a focus on software development, AI training, and BOT creation.

WORK EXPERIENCE

FREELANCER
Graphic Designer & Photographer | 2021-2023

During high school, I worked as a freelance graphic designer and photographer, leveraging platforms like Fiverr and Instagram to attract clients while also securing contracts through my professional network. This experience honed my ability to communicate effectively with clients, understand their unique needs, and find the perfect balance between their vision and my creative expertise.

Through this journey, I developed strong negotiation skills, adaptability, and discipline. Handling diverse clients—including challenging ones—and navigating periods without work taught me resilience, strategic thinking, and the importance of maintaining high professional standards.

PROJECTS

MY PORTFOLIO
JavaScript | HTML | CSS

This is a website I built entirely from scratch, showcasing all of my coding projects—both big and small. Here, you can explore my work and even send emails directly through the site using an API. I poured my passion and skills into this project, and I hope it inspires you as much as it has inspired me to create.
